

DEEPU KUMAR

Java Full Stack Developer

📍 Fatehpur, UP 212601 | 📞 +91-7007097252 | ✉ deepukumarftp2002@gmail.com | 🔗 linkedin.com/in/deepu-kumar-5b3493324 | 💻 github.com/Deepu480

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with hands-on experience in Spring Boot, React.js, and REST API development. Skilled in designing and building scalable, secure web applications with JWT-based authentication, relational and NoSQL databases, and clean architecture principles. Adept at DSA-driven problem solving and performance optimization. Passionate about delivering production-quality code and continuously learning modern technologies to solve real-world problems.

TECHNICAL SKILLS

Languages:	Java, JavaScript, SQL
Backend:	Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication, JDBC
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Databases:	MySQL, MongoDB
Cloud & DevOps:	AWS (Basics), Git, GitHub
CS Fundamentals:	OOP, Data Structures & Algorithms, DBMS,
Tools:	IntelliJ IDEA, VS Code

INTERNSHIP & EXPERIENCE

Competitive Programming Intern | Coding Blocks

May 2024 – July 2024

- Built optimized solutions for complex algorithmic problems applying advanced Data Structures (trees, heaps, hash maps).
- Improved code efficiency through time and space complexity analysis, achieving measurable performance gains.
- Presented insights on scalable system design and algorithm optimization strategies to peers.
- Strengthened problem-solving skills relevant to backend development and high-performance Java applications.

PROJECTS

Employee Management System | Java, Spring Boot, MongoDB, JWT

Aug 2025 – May 2026

- Developed a robust full-stack backend application using Java and Spring Boot, following clean architecture and OOP principles.
- Implemented secure JWT-based authentication and authorization covering signup, login, logout, and profile management.
- Designed RESTful APIs for complete employee data management with CRUD operations and proper input validation.
- Integrated MongoDB as the NoSQL database for flexible and scalable employee data storage.

Online Banking System | Java, Spring Boot, MySQL, JWT

January 2025 – June 2025

- Built a secure banking backend system using Spring Boot with full user authentication and session management.
- Implemented core banking features: account creation, balance inquiry, fund transfer, and transaction history tracking.

- Designed RESTful APIs with proper validation for handling banking operations reliably and securely.
- Integrated MySQL relational database for structured storage of user profiles and transaction records.
- Ensured data security using JWT authentication and strict input validation mechanisms.

EDUCATION

B.Tech – Computer Science & Engineering | GLA University

Graduating: May 2026

Relevant Coursework: Object-Oriented Programming (Java) | Data Structures & Algorithms | Database Management Systems & SQL

Diploma – Electronics engineering | Mahatma Jyotiba Phule Govt. Polytechnic

May 2023

High School (Class X & XII) | Jai Maa S G M I C Radha Nagar

April 2017

CERTIFICATIONS & ACHIEVEMENTS

- ServiceNow Certified System Administrator (CSA)
- Java Programming Certificate – HackerRank
- Competitive Programming – Coding Blocks (200+ hours of problem solving)

PROFESSIONAL STRENGTHS

- Strong analytical & problem-solving mindset
- Team collaboration via Git/GitHub workflows
- Quick learner – adapts to new frameworks fast
- Leadership in group projects & knowledge sharing
